

FOR HEALTHCARE PROFESSIONALS ONLY

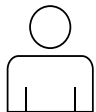

Ready to Administer

Available in your hospital: Ibuprofen 200 mg solution for infusion

Indicated in adolescents and children, aged 6 and above, from 20 kg bodyweight for the short-term symptomatic treatment of acute moderate pain and fever. For when administration by intravenous route is clinically justified or when other routes of administration are not possible. The interval between doses should not be below 6 hours.

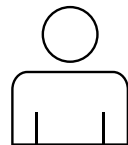

As a general rule, the recommended daily dose is 20 to 30 mg/kg of bodyweight divided into three to four single doses of 5 to 10 mg/kg.

20 kg – 29 kg
(6 – 9 years)

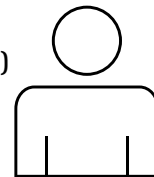

200 mg of ibuprofen up to 3 times a day, not exceeding a maximum daily dose of 600 mg¹

30 kg – 39 kg
(10 – 11 years)

200 mg of ibuprofen up to 4 times a day, not exceeding a maximum daily dose of 800 mg¹

40 kg +
(12 – 17 years)

200 mg to 400 mg of ibuprofen up to 3 times a day, not exceeding a maximum daily dose of 1200 mg¹
